JUNIPERUS SCOPULORUM

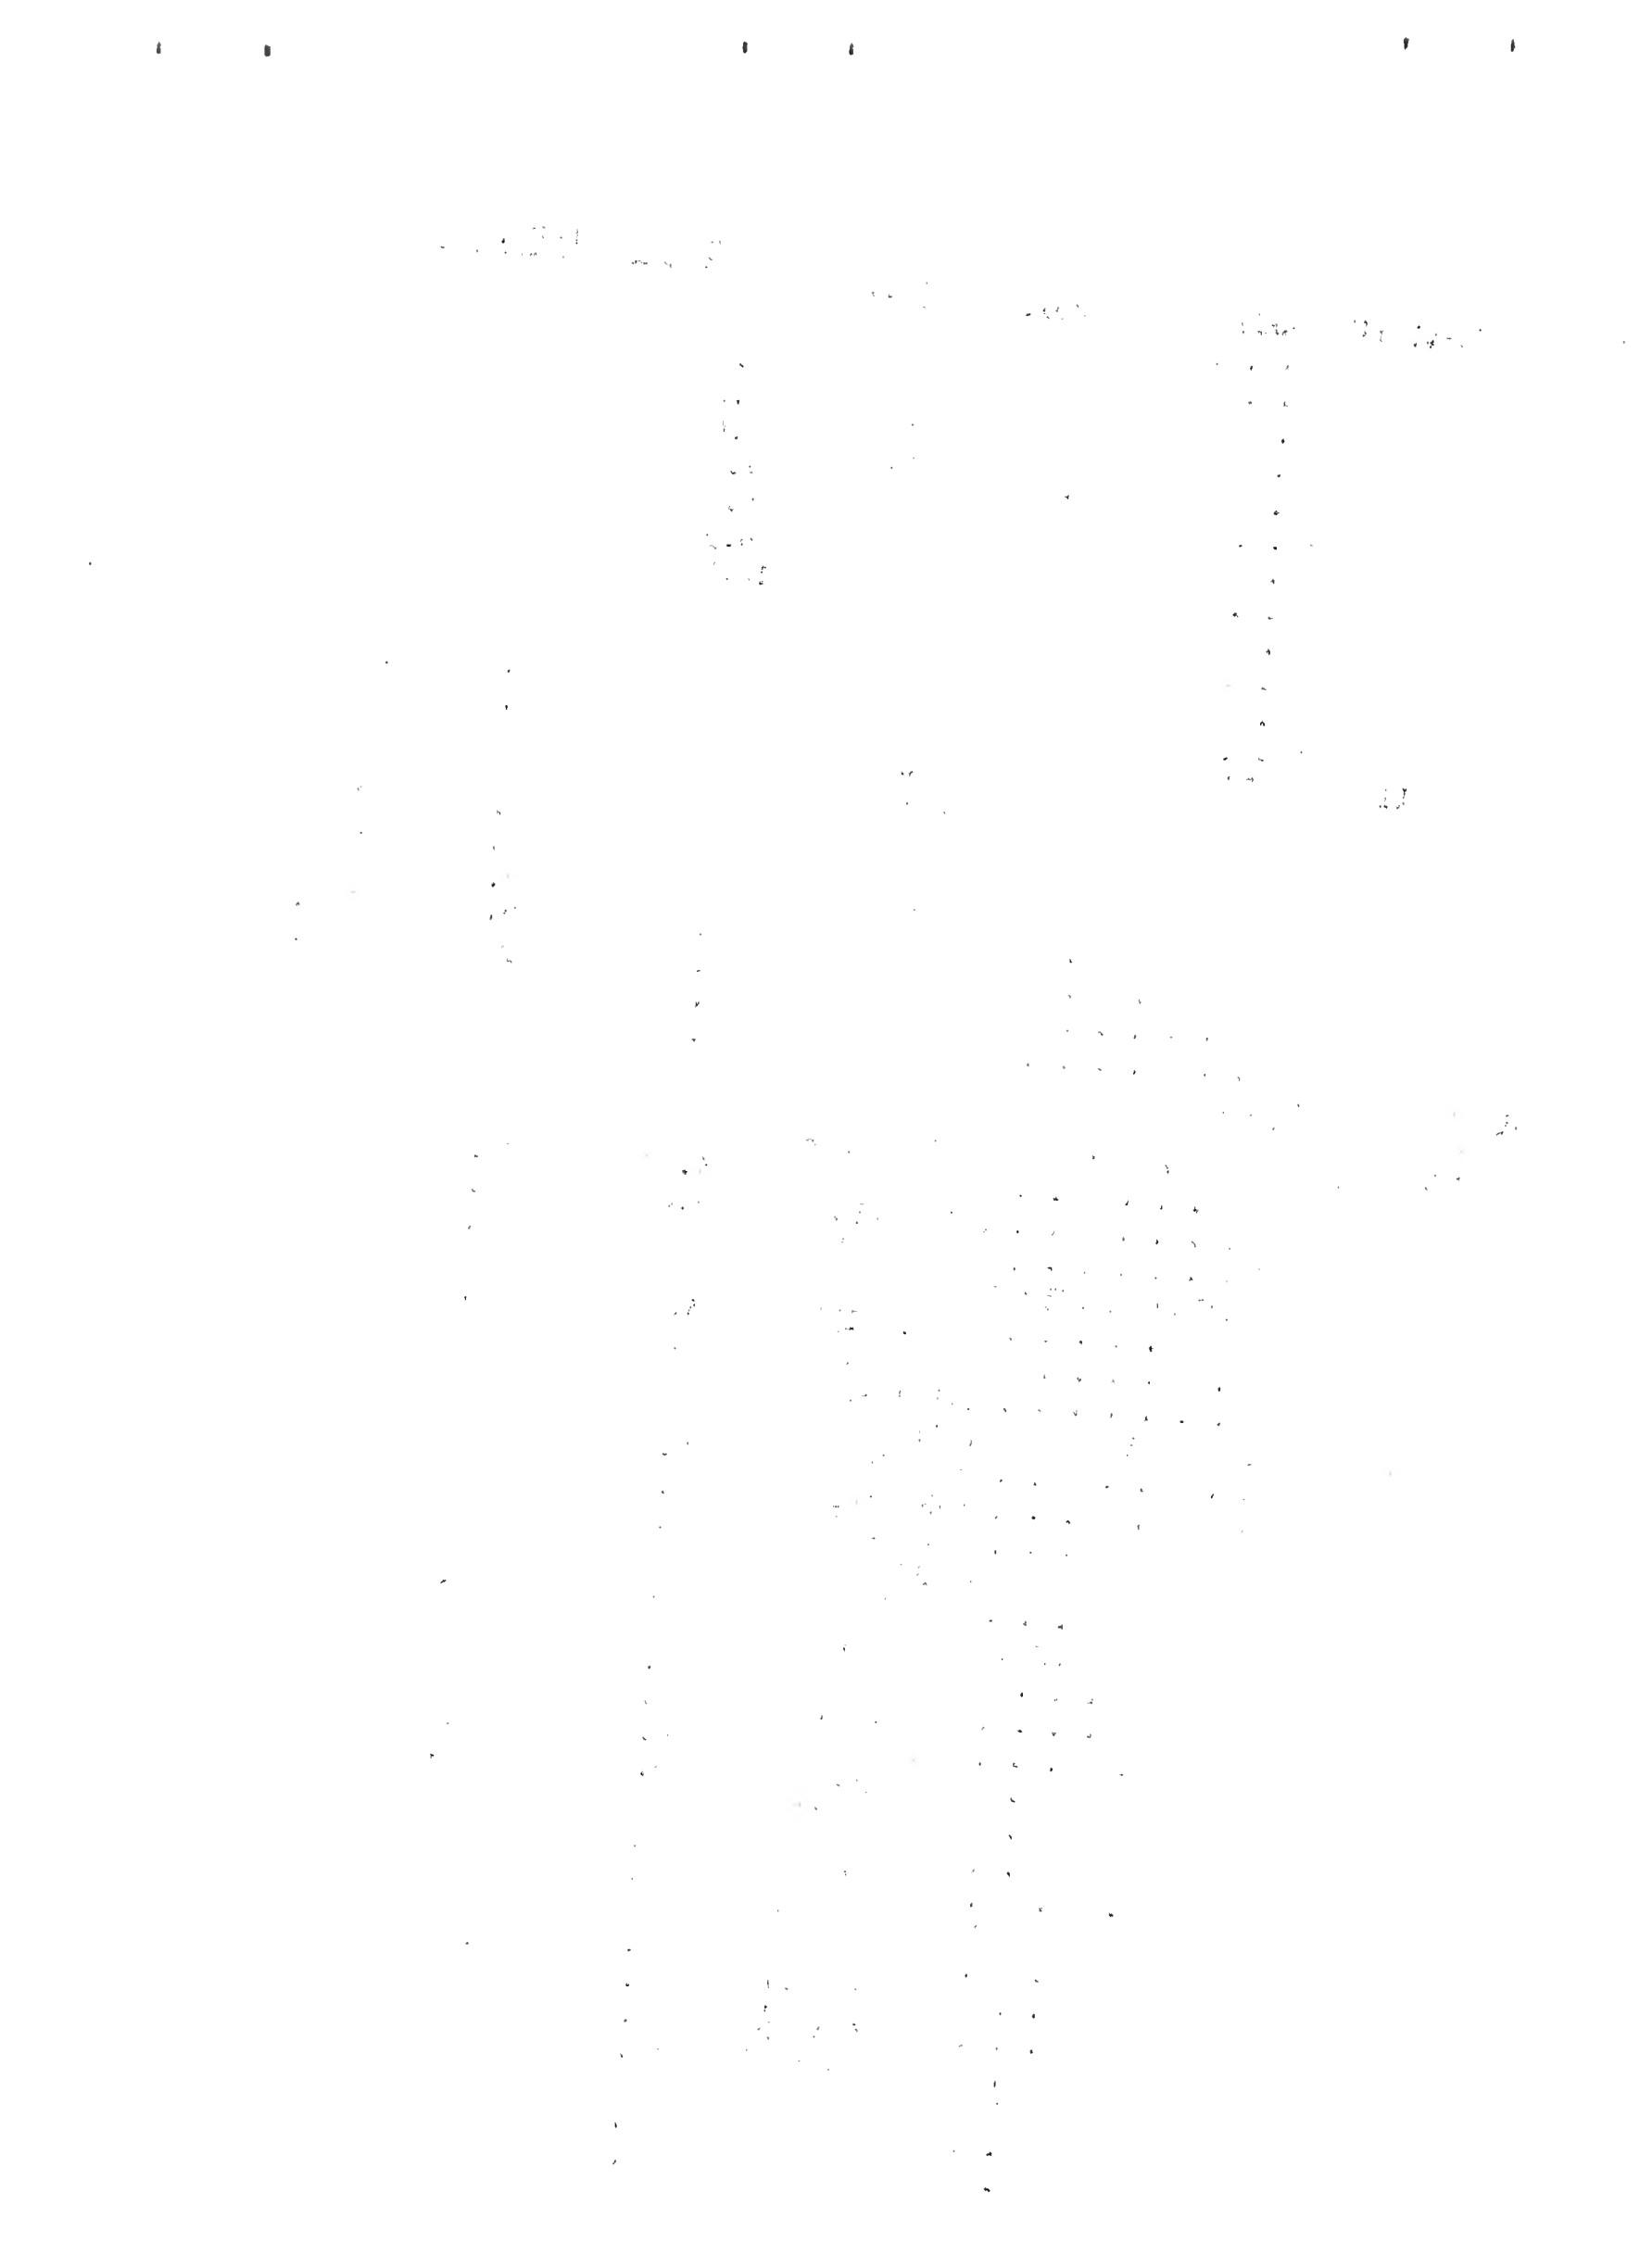

The scopulorum, being extremely drought resistant, is one of the finest Evergreens for the Western half of the United States. It thrives in hot dry weather and the color is brightest at that time.

Types vary more than most any other variety. The following "Various Mixed" are fine grafted varieties in which the name has been lost. These vary from deep green to very silver in color, and are compact, well shaped trees. Prices are the same as our grafted named varieties.

CHANDLER
LANDSCAPE & FLORAL CO.

101 WEST 47TH STREET

KANSAS CITY, MO.

WHY OUR GRAFTS ARE THE BEST THAT CAN BE GROWN

FIRST They are made by expert labor only.

SECOND Made on family stock.

THIRD Made on strong thrifty understock with proper root growth established in $2\frac{1}{2}$ inch pots.

FOURTH Made with long young scions.

FIFTH Proper heat and ventilation to insure proper callousing.

These are only a few of the reasons why Chandler's Grafts make such rapid growth when lined out in the field.

DIRECTIONS FOR PLANTING

Plant directly in the field after freezing weather is over. Have soil well prepared. Plant only deep enough to cover the graft union.

CULTIVATION

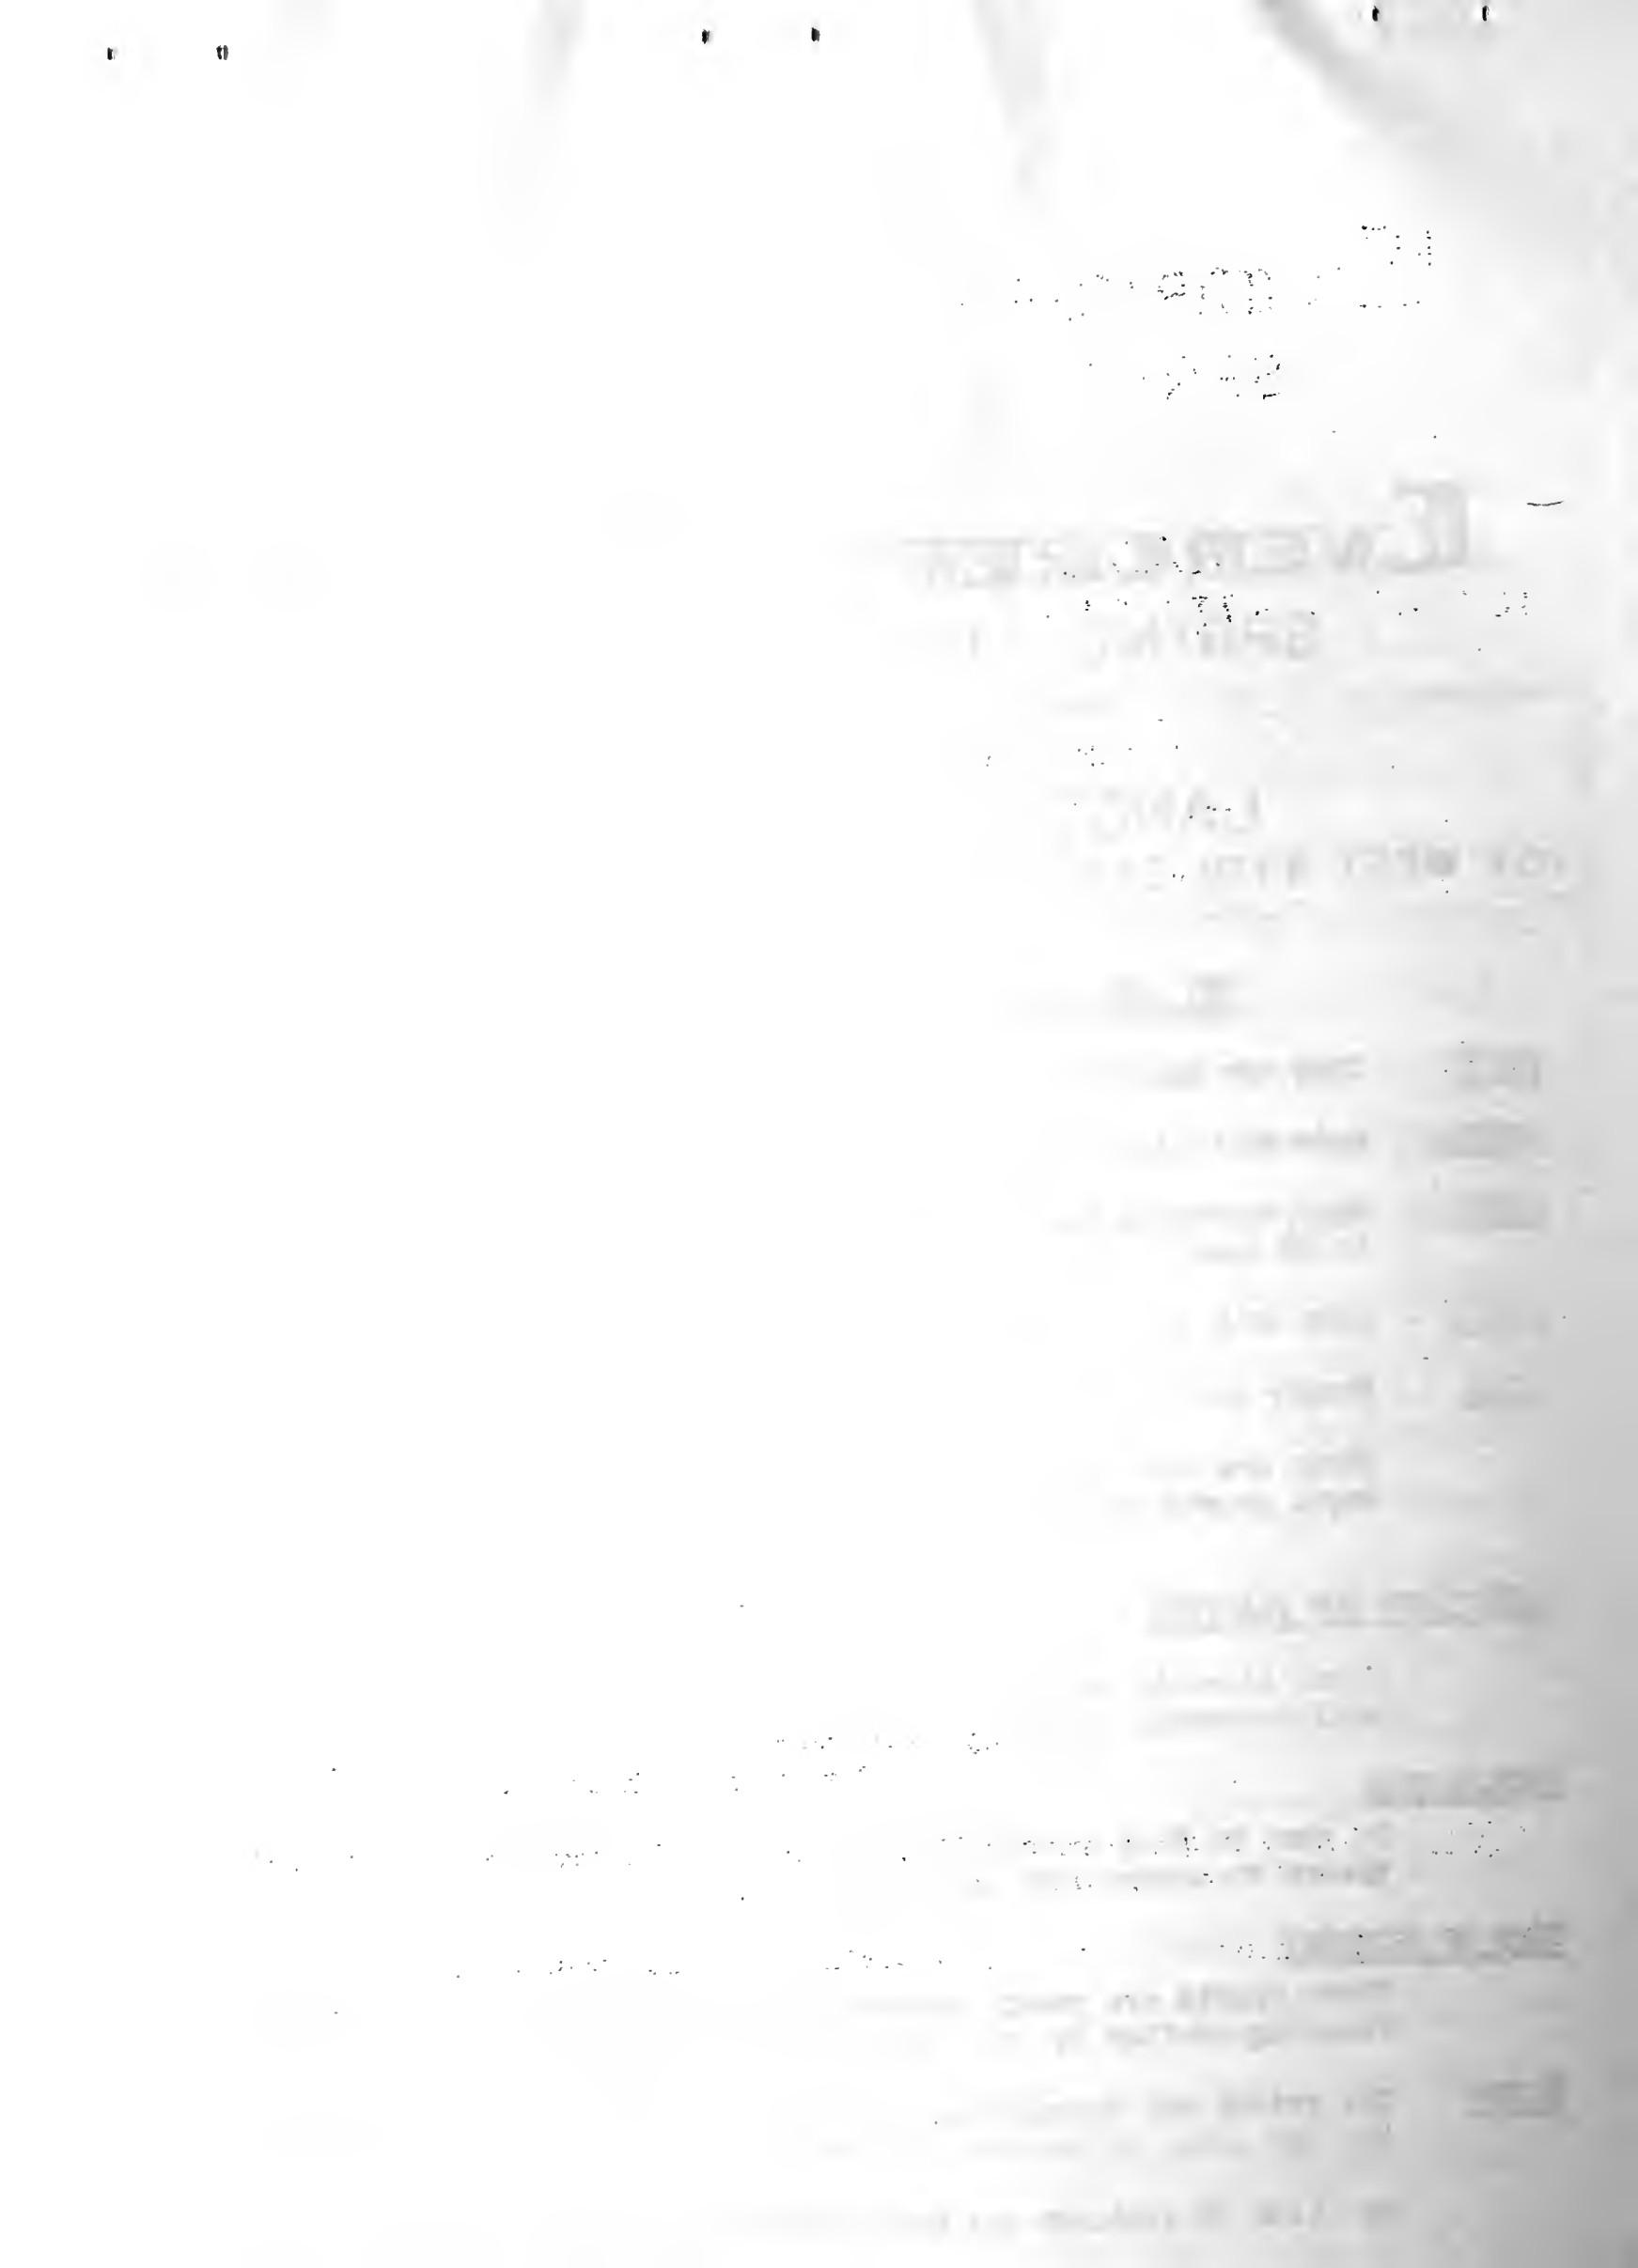

Be sure to keep a dust mulch in dry weather, never allowing the ground to become hard and baked.
